Complete User Guide

[0x01] How to view Screenshots
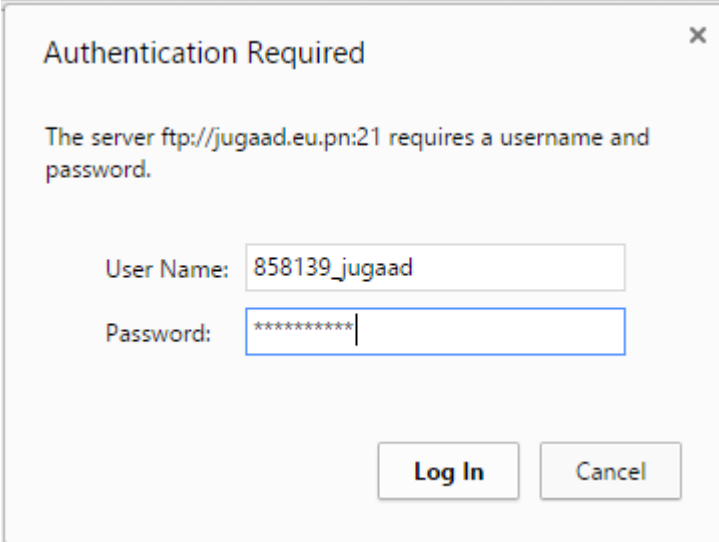

To view the keylogs taken by the application visit the url:
ftp://jugaad.eu.pn/jugaad.eu.pn/keylogger/logs/
and login with
username : **858139_jugaad**
password : **reliance3g**

After successful login this screen will appear listing all the screenshots taken from the target's computer.
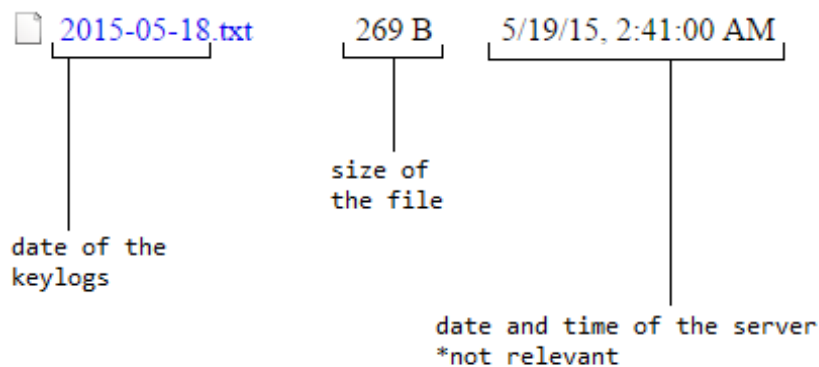

The naming convention of these screenshot files are as follows,

To view any of the screenshot, click on the name of the file and the image will open in the web browser.

[0x02] Control Panel

You could control your remote Screenshot Capture Application by visiting this url:
http://jugaad.eu.pn/keylogger/

- **Monitoring Mode:** use this option to switch ON/OFF the remote Screenshot Capturing Application and Keylogger. After selecting ON/OFF click on "Save Changes" to save the changes.

- **Screenshot Time Interval:** use this option to select the time interval between two consecutive screenshots. The minimum time time interval between screenshots is 15sec. and maximum 1hr.

  Note:
  When the time interval is changed, it will only take effect after the remote computer reboots unlike switching ON/OFF which switches ON/OFF the application immediately.

- **Deleting files:** once you are done viewing/downloading the images/logs you need to delete those files, because the server has a limited storing capacity of only 200mb.

  You can delete files by selecting those checkboxes and then Clicking on the "Save Changes" button.
